

DATA

Futures Data

Keep ahead of the pack

DataTools can provide you with affordable end-of-day data.

Futures • Indices • Cash Metals • FOREX

The Update Service - simple, fast & clean

Just one click to download

Downloads and distributions are fast and efficient, using the latest internet technology. Our dual data servers make the service dependable.

Extensive market coverage

- 66 of the world's most active futures markets across 13 exchanges
- 17 key 'cash' markets, including LME metals
- 13 spot FOREX rates
- Continuous contracts for all futures

Incremental updates

Updates begin with the SFE Edition at 8:00pm and end with the Fianl All Markets Edition at 9:00am the following morning (EST). You can update in stages, or all in one go - whichever suits your needs.

Automatic database maintenance

The data is checked carefully for errors or omissions. Corrections are included with subsequent updates to ensure that data integrity is maintained.

The historical database

Price histories extend back to 1980 for many markets, including the major stock indices. The data is held in MetaStock format.

The Update Program - bonus tools for the futures trader

Charting

No-fuss price charts allow you to view prices as soon as they are updated.

Continuous contracts

Create continuous contracts according to your own specifications and in two different forms - 'spliced' and 'back-adjusted'.

Currency conversion

View spot rates against the US dollar or convert sums between currencies.

Contract details and pricing

Get the value of a minimum tick for the S&P 500 or simulate a trade in Chicago Wheat with the result shown in Australian dollars.

Risk Management

Nominate an entry price, stop level and the amount of money to risk, and the Risk Manager will tell you how many contracts you can afford to trade. Or compare markets for relative risk using the Risk Equaliser.

Data is provided on an historical and end of day basis.

DataTools is provided free of charge with a historical data CD and comes with a basic charting application; you only pay for the data.
